

Capstone Interiors provides design and procurement services for student housing facilities across the country. Our scope encompasses a wide variety of projects including clubhouses, outdoor spaces, student unit furniture, model apartments, leasing offices, corporate offices, fitness centers, game rooms, etc. Our portfolio includes projects both on and off campus across the United States.

Our goal is to bridge the gap between the services provided by the architect and the furniture vendors. We work closely with our developer partners as well as university management and owners. We create functional furniture plans, select durable, high quality furnishings, coordinate fabrics and interior finishes, facilitate purchasing, and manage the installation process. We pay attention to the details to ensure a flawless result, which means your property will be a place that students and employees want to call home.

With over 60 years of combined experience, our team includes interior designers who have passed the National Council for Interior Design Qualification examination, the USGBC's Leadership in Energy and Environmental Design examination, and are Registered Interior Designers with the State of Alabama. We are also active in our local design community and are professional members of the International Interior Design Association Alabama Chapter.

While we operate under the umbrella of Capstone Real Estate Investments, we have a close relationship with the other Capstone companies. Our affiliation with them allows us to draw on the experience and expertise gained from over 20 years in the student housing market. Working with a combination of the Capstone companies and other developers gives us the opportunity to diversify our projects both in location and scope.

If you have a unique project you would like for us to consider, please contact us for more pricing and information at info@capstone-interiors.com.

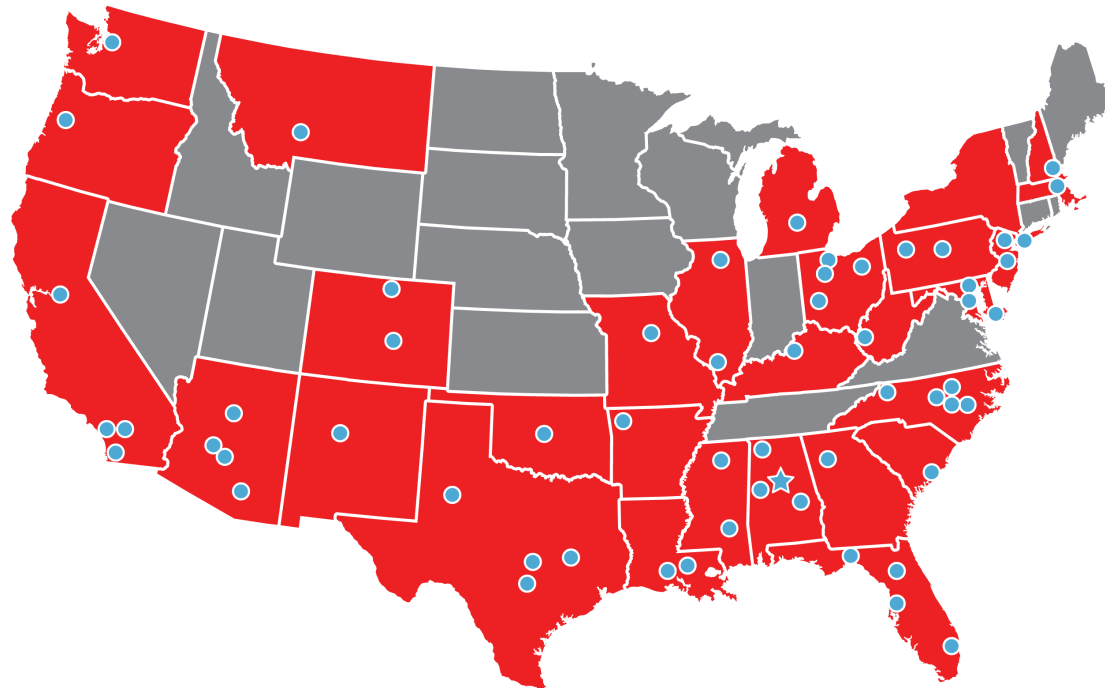

CAPSTONE INTERIORS

Capstone Interiors provides services from the beginning of a project until completion.

Typical services include:
